### Quick Guide: Completing Provider Treatment Plan – Mental Health

**Obtain your client’s CTP claim number and the name of the insurance company.**

- Compete and submit a provider treatment plan. All sections must be completed.

- The insurer will communicate a decision in writing within ten calendar days of receipt. The insurer will provide an explanation if the plan is declined in part or in full.

- Account for pre-approved treatment expenses should be processed within 10 calendar days of the insurer receiving a valid tax invoice.

- Contact the insurer if you have any questions or concerns regarding your client’s rehabilitation.

### Current clinical findings
List the problems that are currently preventing your client from participating in their normal activities (e.g. family, paid work, social). Include key indicators, signs and symptoms associated with the problem.

### Test results/outcome measure results
List relevant psychological tests performed along with up to date test scores and summary analyses.

### Factors affecting recovery
Note risk factors that are likely to be barriers to your client’s return to social and occupational roles. Barriers may include those related to your client’s physical, cultural and environmental situation. Note appropriate treatment strategies relevant to the claim.

### Current diagnosis
Indicate diagnoses and the relationship to the motor vehicle accident (report diagnoses utilising the DSM-5 multiaxial classification). Please indicate with ‘N/A’ next to each axis where no diagnosis is present.

### Treatment progress
To be completed if treatment has commenced prior to submission of initial plan. Detail progress to date in terms of the treatment goals. What target problems and associated goals were agreed with the claimant? What treatment has been provided and what progress has been made in terms of goal attainment?

### Details of treatment proposed
Include concise details of the target problems and associated treatment goals which have been agreed with the client, and how these goals will be achieved (the treatment method). Treatment goals should be SMART: Specific, Measurable, Achievable, Realistic and Timely. Include the timeframes for these goals to be achieved and how outcomes will be measured.

### Self-management strategies recommended
Include details of self-management strategies recommended to your client to assist with their recovery at home.

### Proposed treatment
Duration of the treatment plan during acute and sub-acute stages should be generally less than twelve weeks. Beyond twelve weeks, or in complex cases, it is appropriate to reassess progress and prepare a subsequent treatment plan. Other details of proposed treatment could include aids or medication.
